

Rankify - Student Project Evaluation & Leaderboard System

Project Report (Testing Version)

Rankify is a web-based platform designed to manage student projects, evaluate submissions, generate rankings, and display leaderboards. The system allows students to submit projects, administrators to review them, and users to view rankings based on evaluation scores.

Objectives

- Centralized project submission system
- Automated ranking generation
- Project evaluation and scoring
- Leaderboard visualization
- GitHub integration for project links

Modules

1. Student Management
2. Project Submission
3. Evaluation System
4. Leaderboard Management
5. Admin Dashboard

Technology Stack

Frontend: HTML, CSS, JavaScript

Backend: Node.js / Express

Database: Oracle Database

Version Control: Git & GitHub

Conclusion

Rankify provides an efficient solution for managing academic projects, evaluating submissions, and presenting rankings in a transparent manner.
